

Current Sensing Device for Ozone

Model: 99646

Your BWG Current Sensing Device is designed to adapt the BWG Ozone Generator Model 99815A to a whirlpool system.

Please read and follow all instructions carefully.

IMPORTANT SAFETY INSTRUCTIONS

You should have received safety instructions with your whirlpool. Please read and follow them carefully.

ELECTRICAL INSTRUCTIONS

WARNING – RISK OF ELECTRICAL SHOCK: All electrical connections must be accomplished by a qualified electrician in accordance with the National Electric Code and any local codes. In addition, a **GFCI MUST** protect all branch circuits to the whirlpool, and every electrical component **MUST** be grounded.

INSTALLATION INSTRUCTIONS

1. Insert the AC (NEMA) plug on the Current Sensing Device into a standard AC electric outlet.
2. Plug the Nema power cord from the pump into the bottom of the Current Sensing Device:
 - a) Pump with air switch
 - b) Pump with internal circuit board or multi-speed pump
 - c) Pump with internal circuit board or multi-speed pump
 - d) Electronic pump system control
3. Plug the cord from the BWG Ozone Generator part # 99815A into the side of the device.

CURRENT SENSING FEATURES

- Turns on Ozone Generator automatically whenever Pump is activated.
- Permits Ozone Generator to be added to any system.
- Rated 120v, 60 Hz, 14.1 amps.

OPERATION INSTRUCTIONS

1. **TURNING SYSTEM ON** - Press the On/Off control to start the pump. The Ozone Generator will automatically function while the pump is activated.
2. **TURNING SYSTEM OFF** - Pressing the On/Off control will turn the pump off. The Ozone Generator will automatically turn off when the pump is deactivated.

TROUBLE SHOOTING

- Pump doesn't Activate - No power: Plug a light into wall socket to test.
